BRIEFING NOTE – Change of AeroShell Grease Shelf Life

The purpose of this note is to announce that the shelf life of AeroShell Grease has been increased to 6 years. The increase in shelf life to 6 years will be applied to all pack sizes and for the following products:

AeroShell Grease 5
AeroShell Grease 6
AeroShell Grease 7
AeroShell Grease 14
AeroShell Grease 22
AeroShell Grease 33
AeroShell Grease 58
AeroShell Grease 64

The Certificate of Analysis will be reflected to state: *“Shelf life of AeroShell Grease is 6 years from the date of manufacture. The validity of shelf life is based on the container remaining unopened, undamaged and stored under shelter at constant ambient temperature condition. A retest is recommended 3 years after date of manufacture.”*

Certificate of Analysis for previous production batches of AeroShell Greases cannot be re-issued. For current products in the market, the revised shelf life of 6 years can be applied to existing batches of AeroShell Grease, provided they have been unopened, undamaged and stored under shelter at constant ambient temperature condition.
